

White paper on Rating for Website

The underwriting process can be time-consuming and tedious. One way many insurance companies are overcoming this issue while remaining profitable and competitive is by outsourcing some of the processes. Not too long ago outsourcing was an unfamiliar concept that seemed risky, but times have changed, and companies have to change with it to remain successful.

A large part of the underwriting process is data entry and following up on required information and documentation. A company can save a significant amount of money by outsourcing part or all of the underwriting process. This is where Selectsys comes in. The Selectsys team is experienced and fully qualified to assist you in the underwriting process. We implement a proven strategy where we utilize Standard Operating Procedures to ensure accuracy and speed to not only increase customer satisfaction but also allow room for your customer base to grow.

We understand handing over the entire underwriting process may not be what is best for your company; we are here to help wherever you need it. Some commonly outsourced underwriting tasks that we have extensive experience with include the following:

- We can review all documentation and note any missing/incomplete information and request those items from the applicant before the underwriter reviews.
- We can enter new business into your system to "block"/prevent duplicate submissions.

Once all required information has been gathered and the applicant has been entered into your management system, we can either pass the submission onto your underwriter or take it a step further and quote/rate the submission as well.

We at Selectsys have 15 years of experience in P&C underwriting services. We have extensive knowledge of the websites of 50+ insurance companies and we specialize in commercial and personal lines. Our goal at Selectsys is to make the underwriting process simpler and smoother for your company. We want to help you succeed.
